

TABLE 3.1 Stormwater feasibility study issues.

What	What are the goals of the stormwater program? What are the program needs, priorities, and financial requirements? What are the key cost of service, rate making, and legal considerations? What policies and ordinances are required?
Why	Why should stormwater utility be considered as a key funding mechanism? Why should credits and incentives be considered?
How	How should the capital program be financed? How should the stormwater costs be recovered from properties? How should the stormwater user fees be billed? How should delinquency be enforced? How should stakeholders be educated and engaged?
When	When should stakeholder education and engagement occur? When should the implementation tasks be completed? When should the utility be launched if the utility is deemed feasible?
