**List last updated on 4/29/2022*

New Jersey Future maintains this list as a service to municipalities, counties, and local utility authorities that are considering the stormwater utility concept, and for community organizations that arrange public meetings and training sessions that require speakers with such expertise. New Jersey Future adds firms to the list at their request; inclusion of a firm does not represent any endorsement of its qualifications; local governments should do an independent review before hiring a firm.

To have your firm added to this list, contact Brianne Callahan at bcallahan@njfuture.org
